EDUCATION

University of Virginia

B.S. Computer Science & B.A. Mathematics | GPA: 3.94/4

Master of Computer Science (M.C.S.)

Charlottesville, VA

Expected Graduation: May 2027

Expected Graduation: May 2028

EXPERIENCE

Junior Software Engineer

June 2026 – Present

Songbird Strategies

Remote

- Built and deployed a full-stack company research platform using TypeScript, React, Next.js, PostgreSQL, and LLM APIs to collect evidence from multiple data sources and generate client-ready reports.
- Migrated production data storage from file-based persistence to PostgreSQL using Supabase, designing database schemas, managing credentials, and coordinating deployment with zero downtime.
- Owned features end-to-end from requirements and implementation through testing, code review, deployment, and production debugging while collaborating directly with company founders.

Software Engineering Intern

January 2026 – May 2026

City of Charlottesville IT Department

Charlottesville, VA

- Designed and developed a full-stack ASP.NET MVC application in C# that replaced a manual email notification workflow with a scalable, database-backed system and RESTful APIs.
- Implemented secure token-based email verification and unsubscribe workflows, automating subscriber updates while improving data integrity and system reliability.
- Conducted independent research evaluating ChatGPT, Gemini, Copilot, and Qwen2.5:7B on a public Charlottesville dataset, building a reproducible Python and pandas framework to benchmark analytical accuracy, efficiency, and interpretability.

Teaching Assistant

August 2025 – Present

Advanced Data Structures and Algorithms; Discrete Mathematics

Charlottesville, VA

- Support courses with 200+ students by leading review sessions and explaining graph algorithms, data structures, proofs, boolean logic, and other technical concepts.
- Grade assignments and exams, provide targeted feedback, and collaborate with faculty to design assessments with appropriate difficulty and subject coverage.

PROJECTS

Hoo Wants Some

August 2025 – December 2025

- Developed and deployed a full-stack Django marketplace with a five-person team, implementing user listings, messaging, moderation, and notifications for UVA students.
- Led quality assurance by designing test plans, triaging defects, coordinating fixes, and implementing an application-wide notification system using Django signals and JavaScript.

Wikipedia Path Finder

December 2025

- Translated Dijkstra's shortest-path algorithm into a Python graph-search application that identifies the shortest hyperlink paths between Wikipedia pages across thousands of nodes and edges.

SKILLS

Programming Languages: Python, TypeScript, JavaScript, C#, Java, C, SQL, HTML/CSS, Solidity

Frameworks & Libraries: React, Next.js, ASP.NET MVC, Django, Tailwind CSS, pandas, JUnit, Mockito

Databases & APIs: Supabase, PostgreSQL, SQLite, REST APIs, LLM APIs

Tools & Platforms: Git, GitHub Actions, Firebase, Heroku, LaTeX

EXTRACURRICULAR INVOLVEMENT

Girls Who Code: Hackathon Webmaster

First Year Players: Assistant Director; Social & Alumni Chair
